

JJC Lens Hood LH-XF55200

JJC LH-XF55200 Lens hood is designed for FUJIFILM XF 55-200mm F3.5-4.8R LM OIS Lens. This bayonet cylindrical-shaped hood will be an important investment of this lens. It provides multiple functions: it shades the lens from stray light, improving your contrast and image quality; in inclement weather, it can assist in keeping moisture or wind-blown debris off the lens; and it protects the front barrel from the inevitable impacts against walls, door frames, and other real-life obstacles. JJC LH-XF55200 Lens hood features a non-glare matte finish on the interior surface to further prevent or limit lens flare. The hood is also reversible to stay on lens when not in use. Now the original FUJIFILM lens cap can be attached to the lens normally. JJC LH-XF55200 Lens hood replaces FUJIFILM 55-200mm lens hood.

Product highlights

- Prevent unwanted stray light from entering the lens
- Non-glare matte finish on the interior further preventing lens flare
- Extra protection from accidental impact
